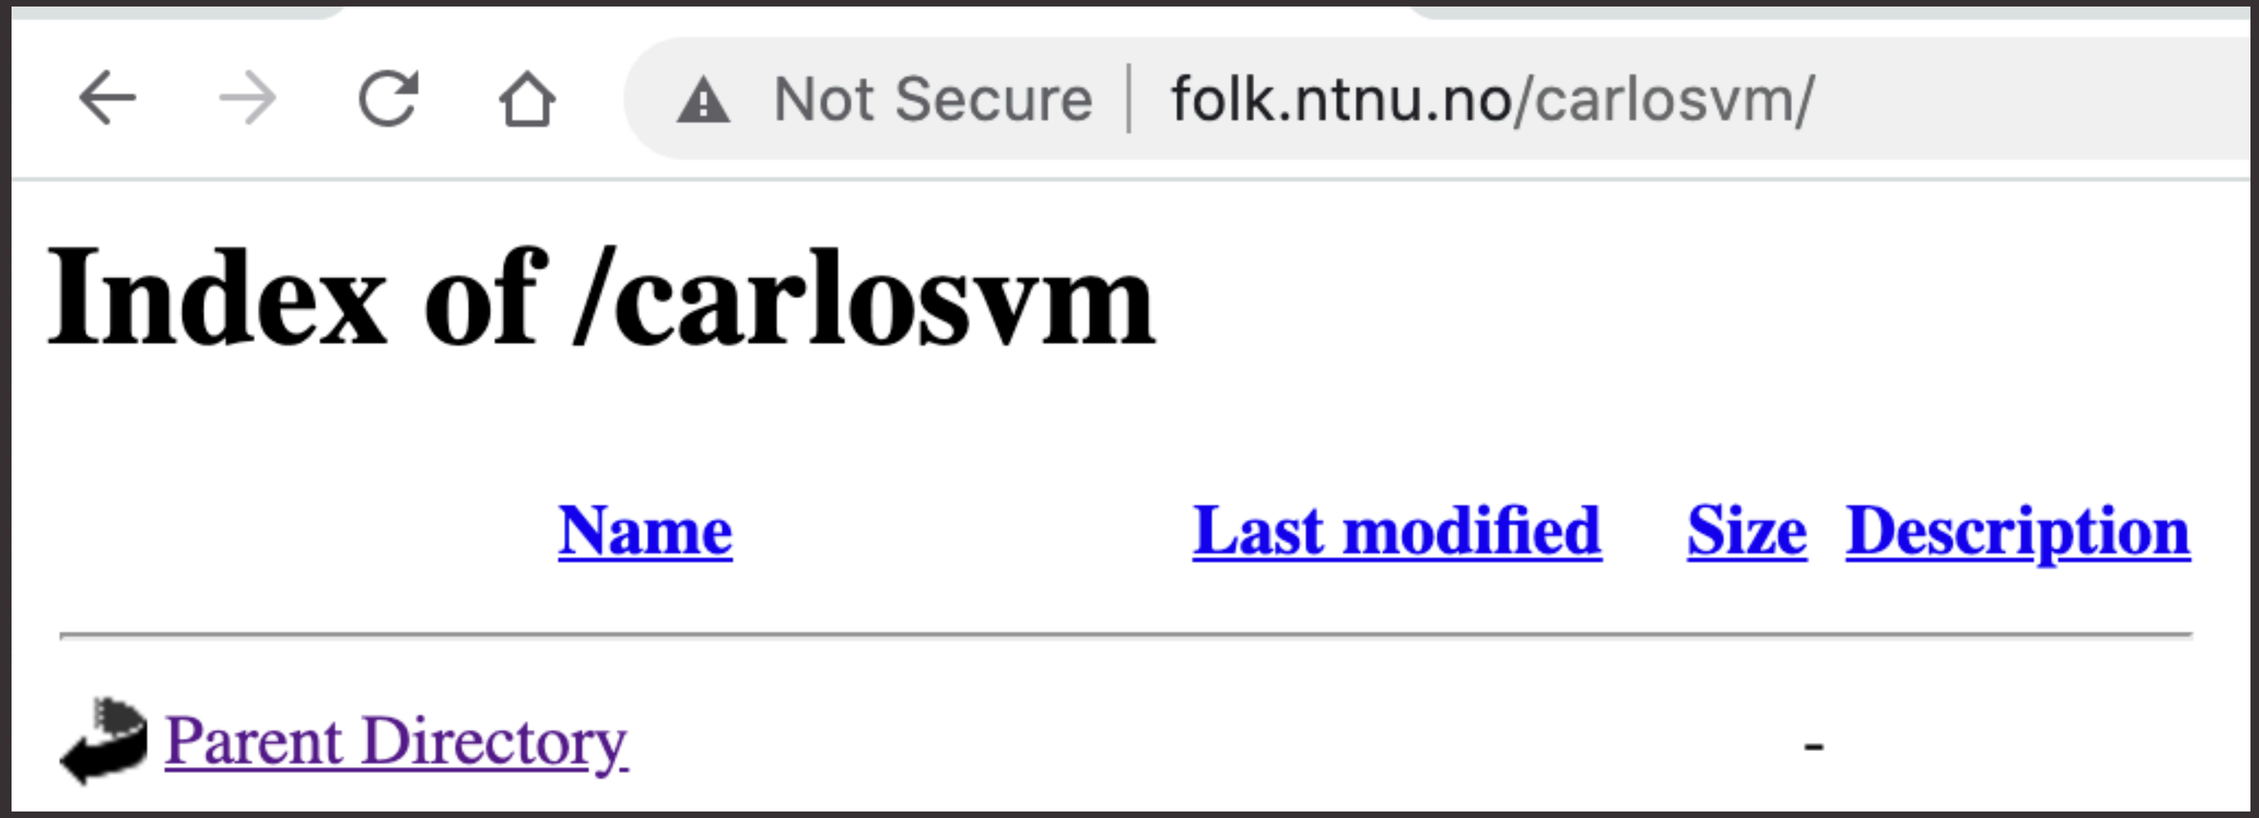
Lab 6

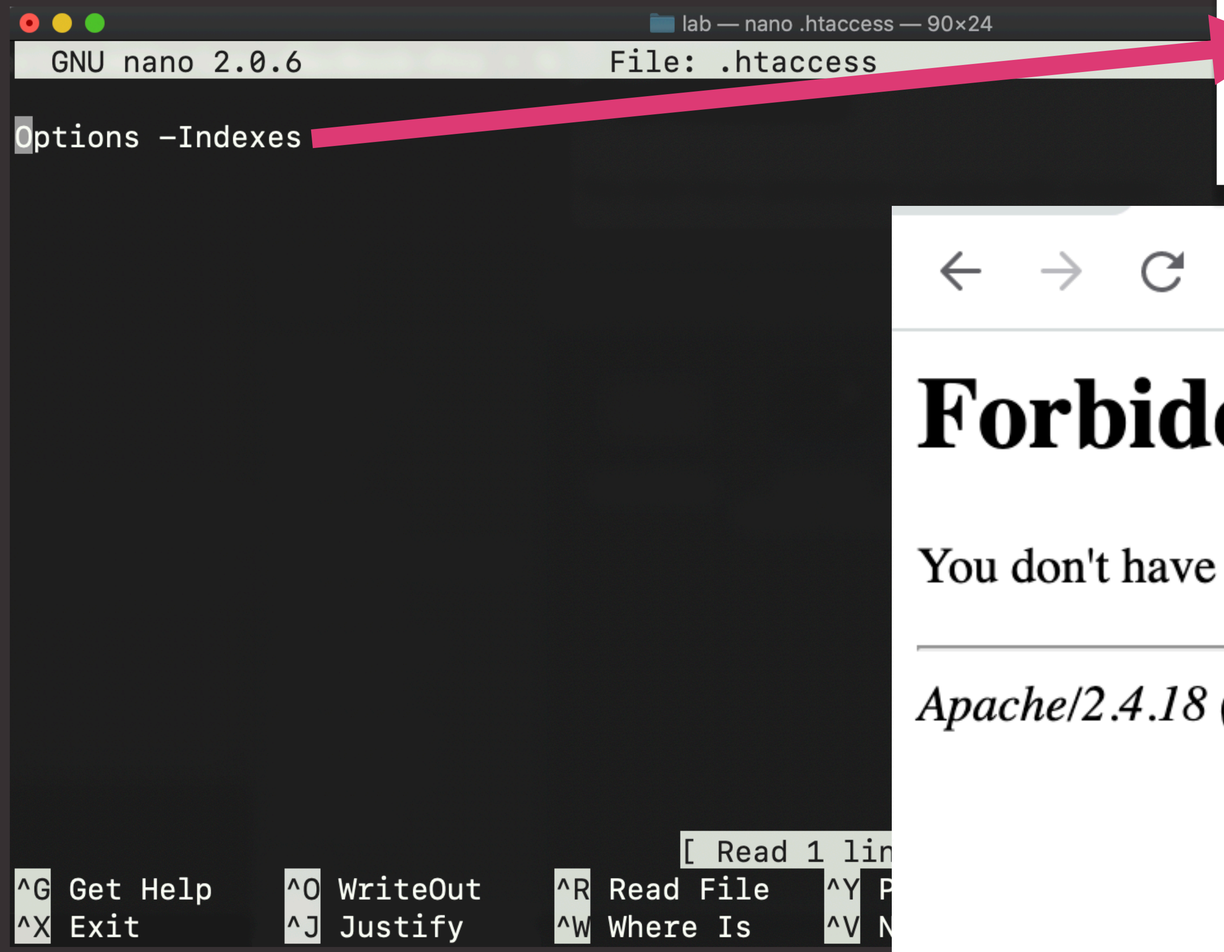
How to protect your site?

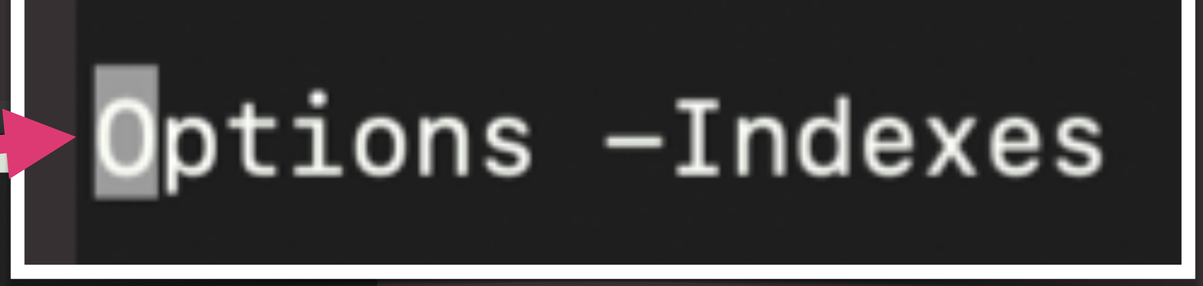
Learn more about the .htaccess

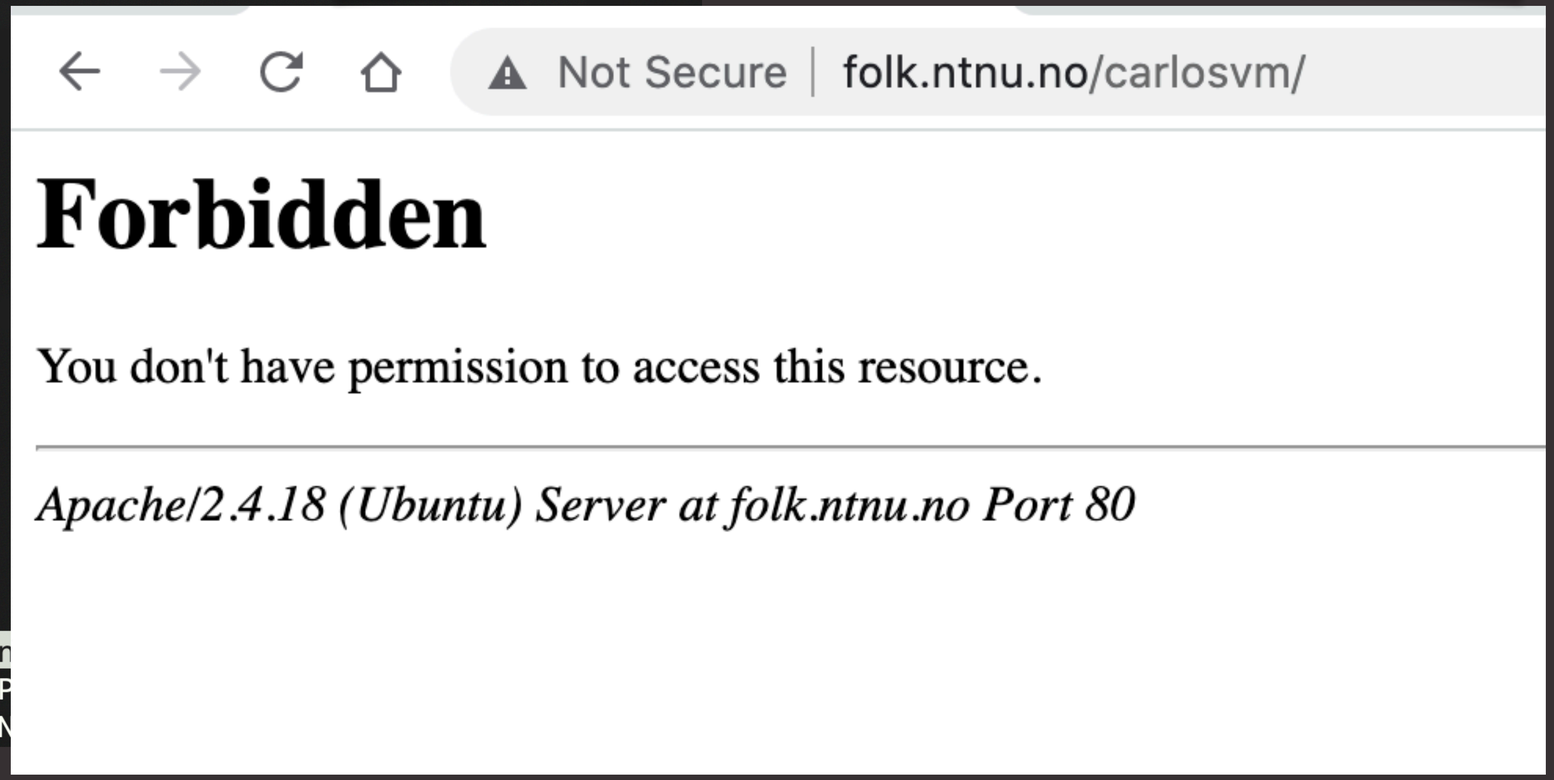
- What is .htaccess?
  - https://www.askapache.com/htaccess/#What_Is_htaccess
- Directory protection
  - https://www.askapache.com/htaccess/#Directory_Protection



Your folk site by default will list all your files. This might a security issue







You can add a .htaccess file in the root folder of your folk site to enable the DirectoryIndex Protection, preventing directory index listings and defaulting

Exercise

0.1

★ Create and add a .htaccess file in your folk site to prevent the directory index listings

Exercise

0.2

★ When uploading your “obligs” in your folk site, I recommend you to use a random name as a root folder.

Exercise

1, 2, 3

★ You will find the description for today's lab in BB.
