

STUDENT CODE: 542769

NAME: Hong Da Vincent Sun

GRADE: PASS

Criteria

NAVIGATION

Homepage

Resume page

Portfolio

Contact

Top menu

Consider the <nav> element in future assignments.

HOME PAGE

Img

description

The alt text must describe the image.

Providing context in the description of the image might improve the SEO. Just as an example, instead of alt="Picture of me" you can say "Image of Carlos Viciant".

alt tag

cite (semantic tag)

Quote (semantic tag)

list of hobbies

proper html tags

RESUME PAGE

Academic background

Work experience

List of languages

List of skills

proper html tags

PORTFOLIO

3 projects with: title +
img + description (or
caption)

proper html tags
design

Some elements have empty class

CONTACT PAGE

Email address + mailto
phone + tel protocol link
Working
external links (>3 social
nets)

GENERAL COMMENTS

Use of semantic tags
(including accronyms and
abbreviations)
Lists and nested lists

Consider using assets folder for your documents, fonts,
icons, images, music, not using this code and videos
folder to make the folder structure more clean

Code structure
CSS usage
CSS optimization

Code readability
User readability
SEO-title

SEO-description

The meta description is needed to improve the SEO.
That tag should describe what is the page talking about.
When naming files, hyphens "-" can be used to denote
spaces.

Naming conventions
design

Naming images describing the content of the image
helps the SEO (e.g.: instead of portrait.jpg, something
like "carlos-vicient-portrait.jpg" would work better).

Final comments	<p>Despite the fact that it works, you don't need to use the "/" to open a file that is in the same folder. As an example, instead of "./images/...png" use "images/ ...png".</p> <p>Your movies size is a bit big in my opinion, your folder size is 632MB. This is bad and it makes it longer to load in the website, keep this in mind.</p>
