General Comments

css rules for less 960px

css rules for less 600px

code structure

css usage and optimization — you can improve on css repeating rules. Example, li:before and li:after could be written li:before, li:after{} notice the comma.

image-file resize
naming-conventions

| Final comments | Well done! Some minor changes could be made to make this perfect. use rgba(255,255,255, 0.7) for the header div to make the div white with opacity but the text would not have opacity. |
